

LMS200 BATTERY WARRANTY

Warranty Not Transferable.

This LMS200 battery is warranted by Deltec Energy Solutions a member of the Hudaco group for a period of twelve months, from the date of sale, to be free of defect in material and workmanship only.

The Warranty

In the event of any defect in material and/or workmanship arising within the said twelve-month period, Deltec Energy Solutions a member of the Hudaco group undertakes in its sole discretion and subject to the following conditions to repair the defect or replace the battery at its own cost and without charge to the purchaser:

1. Any claim in terms of this warranty must be made as soon as the purchaser becomes aware of the defect.
2. The purchaser must return the defective battery to Deltec Energy Solutions or its duly authorised distributors/franchisors for warranty inspection and testing, as per the instructions from its principals.
3. The purchaser must exhibit satisfactory proof of purchase of the battery from Deltec Energy Solutions (Pty) Ltd or its duly authorised distributors/franchisors.
4. The purchaser must provide Deltec with data from the inverter that form part of the system. If that data is not available, the warranty is null and void.

The warranty on the repaired or replaced battery will extend from the original date of sale of the defective battery.

This warranty shall not apply where this battery is used in an application whose specifications requires at battery of a different size/ampere hour capacity to this battery or where this battery is fitted below the suggested ampere hour capacity

(at the 20 hour rate) as specified by the manufacturer or, in the case of original equipment installed by a vehicle manufacturer, not according to their officially specified capacity or where this battery is damaged due to negligence, improper use/application, abuse, incorrect or overcharging, sulfation, whether due to a faulty electrical system or charging apparatus, excessive/abnormal wear and tear, use in a vehicle fitted with additional or non-standard electrical extras, where the battery is fitted close to a heat source that raises the temperature on a constant basis above the levels as prescribed by the manufacturer, environmental conditions or any other damage arising from accident, civil commotion, labour/political unrest or rioting.

LMS200 BATTERY WARRANTY

The warranty shall apply for use in solar applications. This warranty shall NOT apply:

- If the purchaser cannot provide data from the inverter to Deltec for assessment.
- If the battery was in use in a system incapable of providing a report.
- Site visit to be determined if requested.

No liability whatsoever will be accepted by Deltec Energy Solutions (Pty) Ltd or its duly authorised distributors/franchisors/agents for any damage or losses howsoever caused and of whatsoever nature whether in contract and or, direct, or consequential or otherwise as sustained by the purchaser or any other person resulting from the failure or defect of this battery.

CLAIMS WILL NOT BE ACCEPTED UNDER THE FOLLOWING CONDITIONS:

- Proof of purchase cannot be substantiated.
- The battery is out of the warranty period.
- The battery has been fitted to a system for which it was not intended.
- The battery was used for the incorrect application.
- The battery was used for a scrubber; sweeper, golf cart, Jet Ski, wheelchair, or radio.
- The battery was incorrectly installed.
- The battery was allowed to stand for periods with or without current draw and has been subjected to long-term discharge and has resulted in the battery sulphating.

- Battery terminals are damaged by melting and arcing, or are bent, twisted, chipped or otherwise distorted/damaged and or corroded.
- The battery is dry due to overcharging or excessive tilting.
- The battery is flat.
- The battery casing is cracked or otherwise damaged.
- The battery has been damaged due to overcharging, system failures that can damage the battery, loose terminals causing sub-standard connections, defective solar panel energy generation equipment, or faulty battery management systems.
- Non-conforming cable or poor quality cabling is used. Non-conforming or poor quality lugs are used.
- The battery has been discharged to below the manufacturers' depth of discharge curve.
- The battery is used in a system that does not have automatic protection against overcharging or undercharging.
- The battery casing is distorted in any way.
- The batteries are placed in a room/rack/vehicle that does not have mechanical extraction and the temperature is above 22° (degrees) Celsius for a prolonged period of time.
- Deltec has not seen the application where the battery is fitted.
